BRUCE GOLDSMITH DESIGN

Lighten the
adventure

TARGET

The world is changing. Technology is advancing and materials and techniques evolving, and strength comes in ever-lighter packages. Paraglider and paramotor pilots are realising the benefits of lightweight kit, and the ECHO MOTOR is for these pilots. Its low weight translates to easy light-launch characteristics and fun, safe handling. It is for newbies and seasoned pilots alike, and EN/DGAC certification means getting into the air has never been easier.

DESCRIPTION

The ECHO MOTOR is a safe and versatile lightweight paraglider. A stripped-down line-set and lighter materials mean increased performance and versatility with no compromise in safety. The ECHO MOTOR has Bruce's trademark handling and its low weight means less inertia, less shooting and better roll stability. The strong shark nose keeps the leading edge solid at all speeds. Smooth, easy bar action is assured by silky-smooth Ronstan ball-bearings. The ECHO MOTOR is available with free-flight or PPG riser-sets. It offers clear, concise feedback, a relaxed feel and top performance for its class!
